Smart Industrial Applications

IoT system solutions

End-to-end solutions to ensure network security & trusted systems

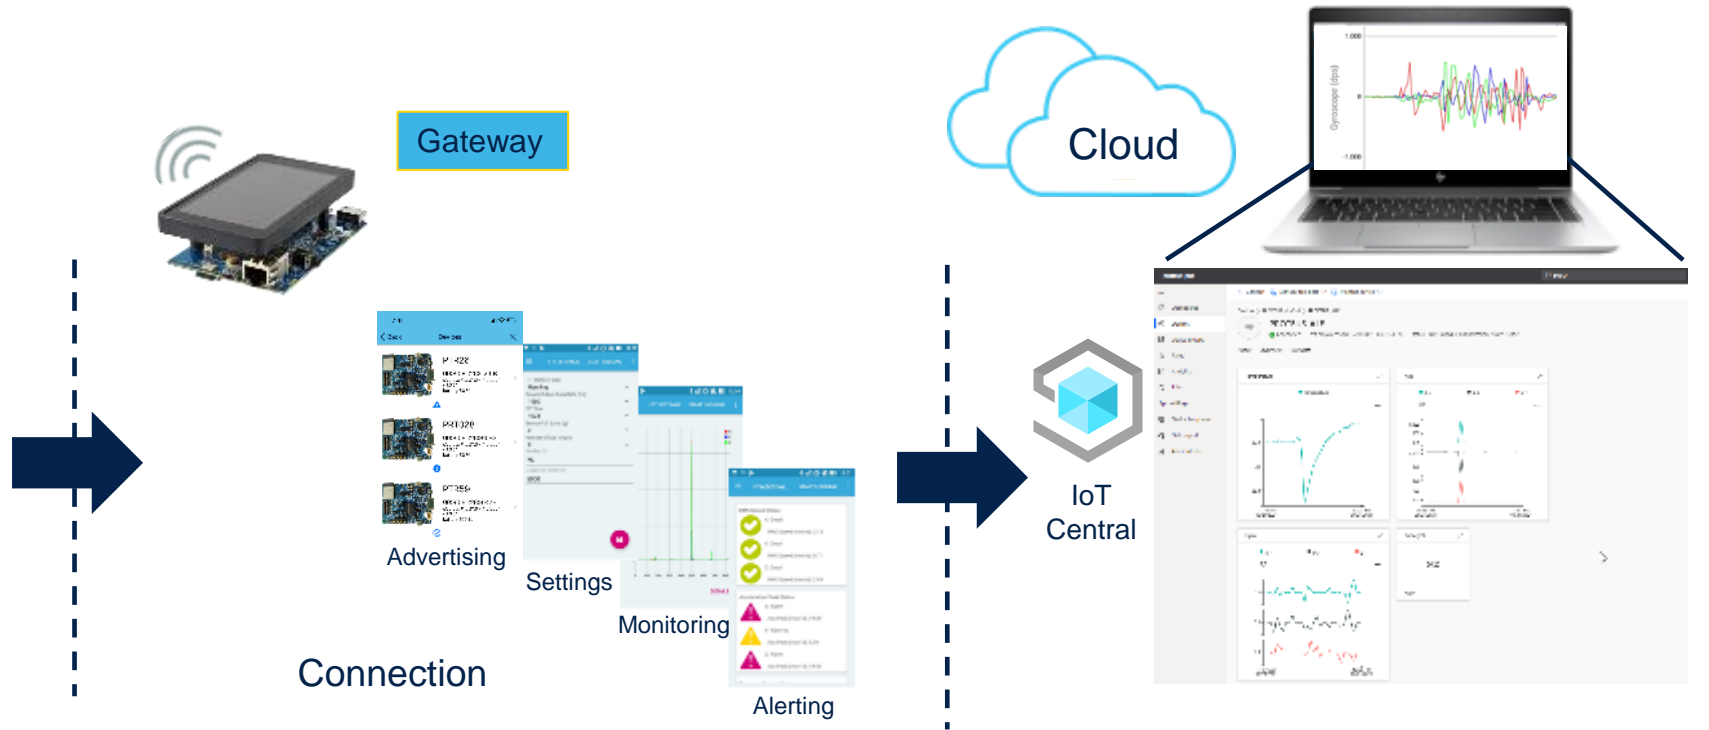

With a rich product portfolio, ST can provide a complete IoT system solution.

Condition monitoring with STEVAL-PROTEUS1

 **ZigBee** to make different nodes communicate within the same ecosystem, thanks to the strength of its mesh network

 **Bluetooth** to allow a direct connection with a smartphone and thus facilitate its **configuration**, local **monitoring equipment status** and firmware upgrade over the air (**FUOTA**)

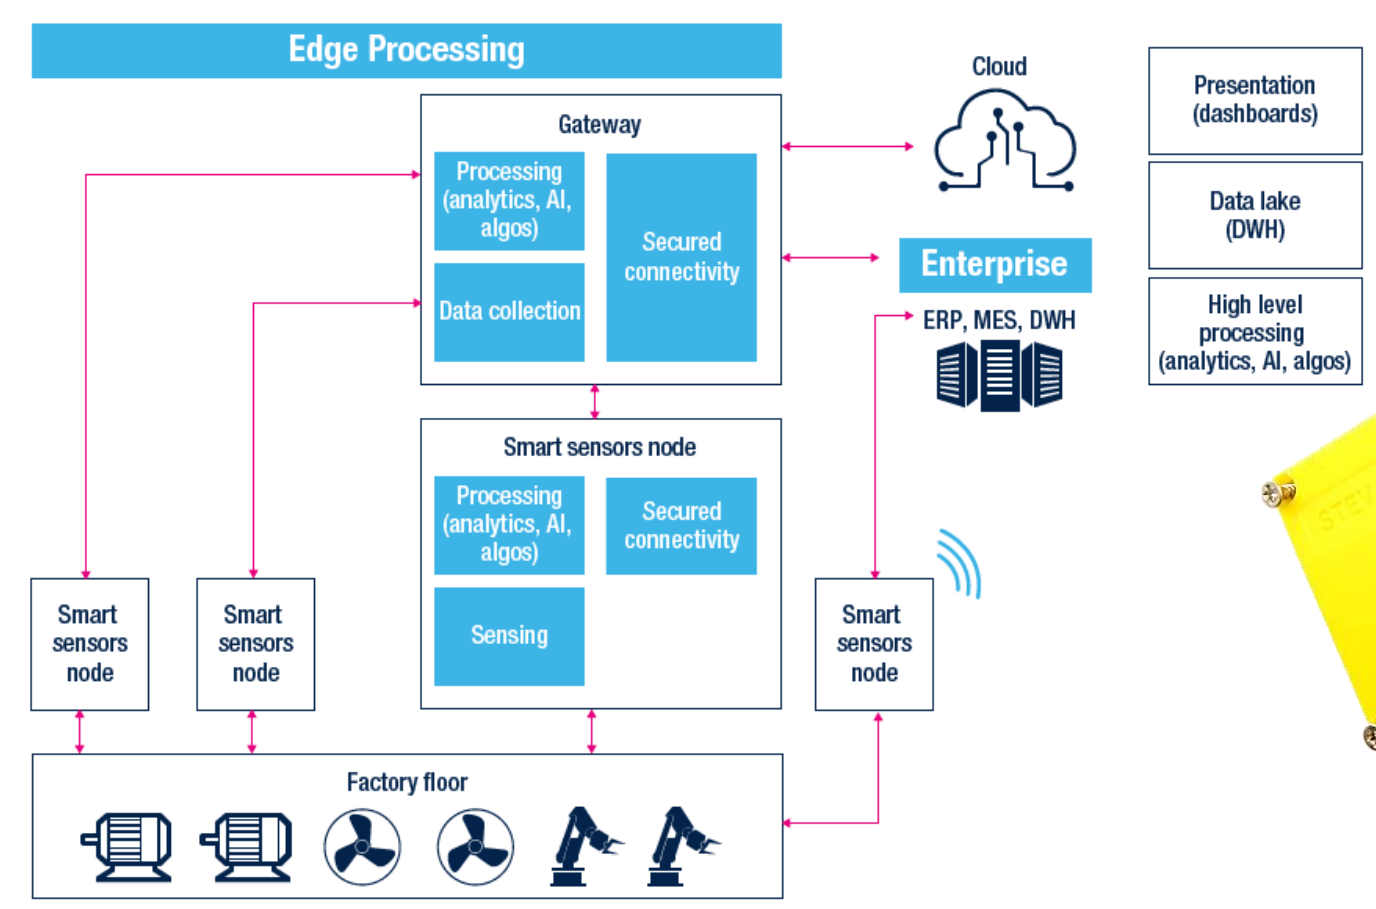

Thanks to **embedded preprocessing** only meaningful **KPI** are sent to Cloud.

Machine **trends**, **statistics reports** and **alarm events** boost maintenance process.

STEVAL-PROTEUS1 applications

Every Industry 4.0 or industry 5.0 application at field level is built around smart sensors
